

## Dairy Products also Containing Eggs

Export certificates for ice cream containing materials derived from eggs must contain both statements of heat treatment of the ice cream and the egg component. These materials will be subject to quarantine in Korea.

The following is our information on what should be included on the VS Form 16-4 for these materials. No other information should be included on the VS Form 16-4. Exporters should have their importers verify prior to export that the issued certificate meets all Korean requirements.

“This office has on file a notarized affidavit from [insert company name] verifying the accuracy of the statements below.

All egg components have been heated at a minimum of [insert the appropriate of: 64°C for 4.5 minutes; 60°C for 5 minutes; or 55°C for 15 minutes].

The entire certified product was: [insert the appropriate of the below]:

- A. Heated at 72°C for 15 seconds or longer or treated at equivalent or higher levels; or
- B. UHT/HTST/LTLT treated, treated at 57-68°C for at least 15 seconds and then matured (limited to cheese), or fermented using lactic acid bacteria, etc.”
