

Inedible Rendered Fats

Must be accompanied by a VS Form 16-4 declaring the product does not have greater than 0.15 percent insoluble impurities in weight.

Exporters must present laboratory results showing that the specific lots of product certified have a maximum level of insoluble impurities of 0.15 percent in weight prior to Veterinary Services certifying the material.

This requirement applies to rendered fats for animal feeding.

NOTE: Veterinary Services only certifies INEDIBLE fats.
